### **Summary:**

Hands on Test lead with over 8 years of continuous professional experience in Quality Assurance and Test fields supporting enterprise and open source solutions for e-commerce, digital, and financial services industry. Proficient and proven experience in process management, reporting, cross functional team coordination of test activities in various SDLC such as Agile, SCRUM, Kanban and Waterfall. Following are highlights of my career achievements:

- Enterprise solution test engagement in SAP ECC6.0 – SAPR/3, Modules in SD, MM, FI&CO
- Led engagement and management of weekly test reports for SAP upgrade and deployment activities to QA Director and SAP Director for successful deployment of one of the largest SAP implementation.
- Led change management meetings for Nook and B&N SAP migration.
- ALM Administration support using HP QC platform, Agile tools using JIRA, Confluence, Jenkins/Hudson
- Designing, Scoping & Defining Test Matrix Incl. Test Estimates & Deliverables to Leadership Team.
- Hands on -Black Box Testing, Grey Box, Integration Testing, Functionality Testing & Regression Testing.
- Led testing efforts on Enterprise solution projects supporting Nook International Expansion, Microsoft Surface and Nook integration, I18nl, ATG ecommerce implementation.
- Management of TLC (Test Life Cycle) for cross functional integration of Nook and B&N business units through first digital expansion into EU
- Established Nook Digital Education QA team and processes to launch first of Nook's education e-reader platform.
- Proficient in testing of Web Services (REST APIs, SOAP) with highly Integrated Environments.
- Strong written, communications & presentation skills with clear understanding of team building.
- Exceptional ability to find innovative solutions to traditional problems.
- Ability to work across functional team in dispersed geographical locations & keep project on track.

### **Technical Skills**
